## **Therapeutic Guidelines Ltd**

Therapeutic Guidelines Ltd is an independent not-for-profit organisation, intellectually and financially independent of government and pharmaceutical industry. For over 35 years, *Therapeutic Guidelines* have provided comprehensive, disease-based recommendations for therapy, based on the best available evidence integrated with clinical experience.

Therapeutic Guidelines are written principally for prescribers, providing them with clear, practical and up-to-date therapeutic information and recommendations for patient management.

### **Our expert groups**

Recommendations in eTG complete are produced by expert groups. These are comprised of eminent and respected Australian medical experts, general practitioners and other users.

These expert groups come together over a series of meetings to achieve consensus on appropriate changes to the content and format of *eTG* complete as well as changes to the recommendations.

They work with our skilled clinical editors to evaluate research data, systematic reviews, local protocols and other sources of information, so that clear and practical recommendations are produced based on the best available evidence.

Members of expert groups are chosen for their many years of clinical experience. They are governed by TGL's policy on conflict of interest and are required to provide interest statements to ensure that eTG complete content is independent and unbiased.

### **Options for purchase**

eTG complete is available on an annual subscription basis, in online and offline formats.
