CASE CHALLENGES IN PAIN AND PALLIATIVE CARE

Palliative Care in Solid Organ Transplantation Many people believe that palliative care would be inappropriate for patients on an organ waiting list, but in fact a palliative care consultation offers many benefits both before and after transplant. Clinical Case, December 08, 2015

What Do I Need to Know About You as a Person to Give the Best Care? Providing optimal patient-centered care requires finding out what is important to the patient.

Clinical Case, October 06, 2015

Is Palliative Care Appropriate for Cancer Survivors? The words 'palliative care' have unfortunately become synonymous with 'hospice' and 'end of life' for many people.

Clinical Case, September 01, 2015

Sexuality at End of Life Taking care of the 'whole person' means also addressing sexuality concerns, which are common in patients with serious illness, those with cancer, and those facing the end of life.

Clinical Case, April 09, 2015

Palliative Care for Patients With Mental Illness Can palliative care benefit this woman with schizophrenia who now has liver failure? Clinical Case, March 16, 2015

Spiritual but Not Religious If a patient tells you she is 'SBNR,' would you know what that means? Is that a euphemism for 'leave me alone'? Clinical Case, February 02, 2015

End-of-Life Care for Veterans Veterans may come with their own special needs at the end of life. Find out how to provide the best care for these individuals. Clinical Case, January 20, 2015

Involving the Family in Postmortem Care Should nurses involve family members in the postmortem care of their loved ones? And if so, how? Clinical Case, December 03, 2014

Building Generalists' Knowledge of Palliative Care How important is palliative care expertise across clinical settings? How can we raise the bar of care provided by generalists?

Clinical Case, August 20, 2014

Preparing for the Time of Death What decisions would you make to provide this family with the best possible end-of-life experience? Clinical Case, May 02, 2014

The Obese Surgical Patient: Multimodal Analgesia Approach An obese woman is undergoing weight-reduction surgery. What are her risk factors for opioid-induced respiratory depression, and how can it be prevented? Clinical Case, March 20, 2014

Palliative Care in the Emergency Department Is it a little hasty to be thinking about palliative care in the emergency room? Clinical Case, January 30, 2014

Placebos in Pain Management Know the facts about the use of placebos in the treatment of pain before you administer one. Clinical Case, November 08, 2013

Acute Abdominal Pain: Manage Without Delay Armed with the facts, nurses can challenge beliefs that treating abdominal pain will obscure the diagnosis. Clinical Case, August 02, 2013

Palliative Care: The Gift of Presence A family member's 'mindful presence' can be the greatest gift to a dying loved one. Clinical Case, June 13, 2013

Ketamine for Refractory Pain For the opioid-tolerant patient, ketamine could be the key to managing acute postoperative pain. Clinical Case, April 23, 2013

Communicating Serious Adult Illness to Children How much do you tell a child about an adult family member's serious illness or impending death? Clinical Case, April 02, 2013

Belief in Miracles in Terminal Illness How should the healthcare team respond when a family is waiting for a miracle cure? Clinical Case, March 13, 2013

Bringing Up the Palliative Care Option When patients face serious illness, when and how should the option of palliative care be introduced? Clinical Case, January 07, 2013

The Burning, Searing Pain of Postherpetic Neuralgia An elderly man presents with burning, searing pain following a herpes zoster infection. Clinical Case, December 19, 2012
