

ETM Course

EMERGENCY TRAUMA MANAGEMENT COURSE

The definitive trauma course for doctors who manage trauma

2017 COURSE PLACES AVAILABLE NOW

Accredited in Australia for CME/CPD by ACEM, CICM, RACGP and ACRRM.

ANZCA Fellows can claim 42 CPD credits (2 credits/hour) under the Knowledge and Skills category.

What is the ETM Course?

The Emergency Trauma Management Course is a 3 day, face to face course for doctors that teaches reception and resuscitation of the major trauma patient.

Who is the course for?

ETM is designed primarily for emergency registrars and emergency physicians, but is also highly relevant for intensive care, anaesthetic and surgical trainees and specialists, as well as pre-hospital/retrieval doctors and rural general practitioners.

ETM Course Objectives

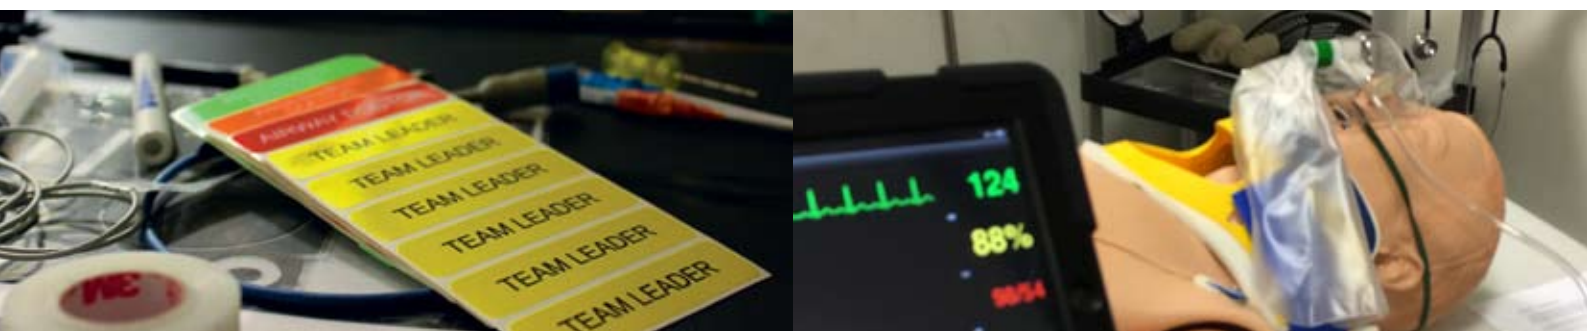

Upon completion of the course participants will be able to:

- Demonstrate a systematic, modern approach to the reception and resuscitation of the major trauma patient
- Perform team leader and team member roles in a trauma resuscitation
- Perform critical procedures to treat life threats detected in major trauma patients
- Recognise, prepare for transfer and refer a major trauma patient to a major trauma centre

Course Features

Short, focused lectures, simulation scenarios and small group interactive sessions including:

- RRM: Resus Room Management – modern ED team leading/team member skills
- Airway: Standard/difficult/failed intubation, cricothyroidotomy
- Chest: Decompression – needle/finger/tube thoracostomy
- Vascular access: Rapid Infuser Catheter (RIC) line and intraosseous needle (EZ-IO) insertion
- Orthopaedic: Spinal immobilisation, pelvic binder, CT-6 femoral traction splint application
- Other procedures: SOF tourniquet application, lateral canthotomy
- Management of traumatic cardiac arrest
- Radiology: Trauma x-ray, CT and FAST scan interpretation
- Transport: Transport and retrieval of the trauma patient
